

Team Member Contributions

- Daniel Jolin
 - Implemented the Logistic Regression model, RESNET, and the Fully Connected Neural Network.
 - Analyzed and interpreted the results from the machine learning models.
 - Contributed to the presentation.
- Andrew Nicola
 - Assisted in selecting data set used for the project.
 - Performed data visualization to gain initial insights.
 - Implemented the SVM algorithm and tested its performance.
 - Helped with fully connected neural network.
 - Combined all individual contributions into a cohesive notebook for the final submission.
 - Contributed to the presentation and the written report.
- Nathan Waters
 - Identified and selected the data set used for the project.
 - Authored the project proposal.
 - Helped with fully connected neural network.
 - Handled data preprocessing.
 - Contributed to the presentation and the written report.
